FORKLIFT SWEEPER CLEARS THE WAY FOR AUTOMOTIVE MANUFACTURER

A leading forklift attachment company is celebrating ongoing business success after providing an automotive component manufacturer with a time-saving alternative to manual sweeping.

Mid Wales-based Contact Attachments, which supplies its range of products to customers across the UK, has recently provided one of its innovative Forklift Broom Sweepers to Maier UK Ltd – market leaders in the manufacturing of high-quality automotive components – to help alleviate the manual sweeping requirements within its <warehouse>.

Jason Cadman, Technical Sales Consultant at Contact Attachments, explained: “This forklift sweeper is the perfect solution for sweeping and maintaining a clean environment and can be used in a variety of applications, including warehouse floors and yards while attached to a forklift truck, or to remove large workloads such as snow, leaves, gravel and sand.”

The Easi-Sweep Forklift Broom Sweeper offers a simple and cost-effective solution for sweeping in medium to heavy duty applications, and benefits from a robust steel body with eight rows of 1,800mm-wide polypropylene bristles.

Lee Grainger, Logistics Manager at Maier UK Ltd, commented: “The Contact Attachments team were extremely helpful and helped us find the right product for our needs. The Forklift Broom Sweeper completely removes the time-consuming task of sweeping our <site> manually – and regularly – and it came at a highly competitive price.

“The customer care we received was superb and I found it a pleasant surprise to be asked after purchasing the broom if everything was OK, and if we were happy with the services and products

provided. We look forward to working with Contact Attachments again in the future as Maier UK Ltd continues to grow,” Lee concluded.

Contact Attachments has been designing and manufacturing forklift truck attachments from its base in Newtown, Mid Wales, for over 40 years and is recognised as the quality leader of truck attachments in the UK.
