This brochure includes mechanical solutions used across various industries. For more information about Keytracker's [electronic key cabinets](#), [equipment lockers](#) or to discuss your specific control issues, please call 0121 559 9000, or visit www.Keytracker.com for details on all our products, or e-mail sales@Keytracker.com with your requirements and one of our friendly staff will be pleased to help.

Why Keytracker?

Keytracker have been providing secure key management solutions since 1996. The original “peg in-peg out” mechanical board, provides a quick and simple way to store, track and secure large quantities of regularly used keys & equipment. Over the years the mechanical system has been tailored to meet the varied requirements highlighted within different sectors.

The requirements from all business sectors continue to pioneer the ongoing development of our range of key and equipment management solutions, such as the increasingly popular electronic key cabinets and cloud based software.

Introducing a Keytracker system will provide an efficient control solution that allows you to do what you do best, without the interruption and cost of lost or misplaced keys or equipment. Some of the other benefits of using a Keytracker system include:

- Complete fool-proof organisation of all keys & equipment
- Increased security for your keys and equipment via the keytracker system with anti-tamper seals and optional self-closing steel push-button cabinet
- Eliminated opportunist theft – via keys sealed together and to a Keytracker board
- Reduced targeted theft – via security cabinet, Keytracker system and security seals
- Faster finding of keys – via numbered properties, vehicles or locks, with matching organised, numbered Keytracker system boards and initialled & coloured user pegs

Some of the reasons why our customers choose us include:

- The world’s largest range of key and equipment management solutions
- Same day despatch - worldwide
- Free system trials are available
- Unique rental options
- All products assembled or made in the UK
- Preferred supplier to many large brands
- ISO 9001:2008 and IIP accredited
- Every customer has a dedicated Account Manager
- Using our expertise; we collaborate with you to create your system, tailored to your requirements and promise to provide the most suitable solution at the best possible value for money
- One stop online shop for all Keytracker products
- We will always beat a competitor quotation

Mechanical Peg System

The Keytracker Mechanical Peg System is a simple 'peg-in, peg-out' board, based on the original "tally" system. Keys or equipment are secured to a numbered 'retaining peg' with an 'anti-tamper seal'. The matching number may be on the paperwork, in the vehicle, or near the lock, for fast finding of the correct keys or equipment. Authorised personnel unlock the required key bunch with their issued 'access peg'. As one of 15 different colours the peg will clearly show which department has the keys. These will typically be engraved with their initials or an allocated number. Multiple pegs can be supplied for employees needing to take more than one set of keys or kit at a time. On return the key bunch will be returned to its corresponding numbered position on the board and the employee will lock the bunch back in, at the same time unlocking their 'access peg' for use the next time they need a set of keys or equipment. At any time the board will show exactly who has any missing keys or equipment.

Accessing keys in 3 simple steps...

1. Insert your personal initialled & colour coded access peg

2. Twist anti-clockwise to release the desired key bunch

3. Remove the retention peg with keys attached

Quantities & Sizes

The Mechanical Systems' modular design means the board can be built to manage any quantity of keys. A steel frame houses the tracks, each consisting of 5 positions. Blank spacer tracks are available for large key bunches, ensuring that all the keys are always stored in their correct position and identifiable at a glance.

Frame Sizes

- | | | | |
|-----------------------|-------------------------|-------------------------|---------------------------|
| ▶ T1 - Single unit | ▶ M10/G - up to 10 keys | ▶ M25/G - up to 25 keys | ▶ M100/G - up to 100 keys |
| ▶ M5/G - up to 5 keys | ▶ M15/G - up to 15 keys | ▶ M50/G - up to 50 keys | ▶ M150/G - up to 150 keys |

System Variations

The system can be linked up with other Keytracker products to provide an all round management solution

Locktracker

A Padlock Storage bar can be added - Simply number your padlocks to match their keys and it will be instantly clear from the access peg colour & initials which trades/departments & individuals are working on which machines, improving health & safety, reducing culpability & ensuring padlocks are always returned.

Key Holding

For rarely used keys, Key-Holding Bars allow additional seals that must be removed, recorded & replaced. Proving keys were or were not used in case of an incident.

May also be used with Keytracker key Control Software for full audits & reports.

Tool tracker

Ensuring tools, ladders & equipment are always returned.

Equipment & Trade Plate Management

The 5 position Keytracker Mechanical System or single T1 unit offers the perfect solution for storing, securing and tracking tools, equipment & trade plates. The anti-tamper seals or cable seals will ensure that staff must assign their name to the equipment by leaving their access peg. At a glance, management or staff can quickly and easily see which equipment is in use and by whom, whilst ensuring its' speedy returny.

T/1 - For keeping track of a single set of keys, tools or equipment.

T/1c - For additional durability when keeping track of heavy or bulky equipment such as ladders or sack trucks.

Security Seals

Easily pushed together by hand, these seals ensure the key bunch is always returned complete.

Anti-Tamper Seals

Writeable anti-tamper seals for securing and labelling key bunches or equipment.

Flexible Wire Seals

200mm steel anti-tamper seals for securing key bunches or equipment. Please specify colour when ordering.

Extra Strength Flexible Wire Seals

250mm Seals

250mm Steel anti-tamper seals for securing large key bunches or equipment.

Product Code - A39C

300mm Seals

300mm Steel anti-tamper seals for securing equipment.

Product Code - A39C

600mm Seals

600mm Steel anti-tamper seals for securing equipment.

Product Code - A39C

1000mm Seals

1000mm Steel anti-tamper seals for securing larger equipment.

Product Code - A39C

Very High Security Seals

Hardened Steel Keyring

Steel Ring seal for use in high security areas such as prisons to keep bunches of keys complete. Diameter of seal 55mm. The Steel Ring can only be used with the Closer, Crimper & Cutter.

Closer - CL1
Crimper - CR1
Cutter - CU1
